🏠 ALGECIRAS, SPAIN

PROFILE

I am studying online for my computer science degree in Denmark. I´m therefore looking for an internship starting on January 1st. I am a quiet and calm person with a background in professional basketball. In my spare time, I enjoy spending time with my family and training in the gym. I am passionate about learning and immersing myself in the tasks that I am assigned.

Basketball player at Pacific Tigers in NCAA

City College of San Francisco
2013 - 2014
Associate´s degree in General Studies
Basketball playet at CSSF Rams in CCCAA

STUDIES

During my studies, the focus has been on acquiring fundamental knowledge about everything from the theoretical aspects of system development and business to the more practical aspects such as technology and code implementation. As a result, I have in-depth knowledge of SCRUM, Kanban, agile methods, system architecture, and code-specific knowledge of C#, MSSQL, WPF, .NET, RESTful API.

Courses

I have completed several courses alongside my studies. Some of the courses I have taken through LinkedIn Learning cover topics such as Blazor, C#, and SQL.

The more advanced courses cover Web API implementation with clean architecture and distributed systems. I took these courses at Pluralsight and Code Academy.

I am currently taking a React course at Code Academy, and a React Native course in FreeCodeCamp
